

Antistatic ESD Cleanroom Hair Bonnet

Description:

The Cleanroom Cap - Antistatic ESD is designed to provide effective ESD protection and contamination control in cleanroom environments. This cap helps prevent the buildup of static electricity and protects sensitive electronic components from ESD damage. It is made from high-quality, antistatic materials and is suitable for use in a variety of static-sensitive settings, including electronics manufacturing and laboratories.

Features:

Fabric: Striped clean room fabric; 98% Polyester, 2% Antistatic
Weight: 112 g/sqmt
Color Options: Blue or White
Design: Unisex, one size fits all with adjustable band
Surface Resistance: 10^6 - 10^7 ohm
Durability: Can be used up to 50 washings
Compliance: Meets industry ESD standards

Applications:

Electronics manufacturing
Cleanrooms
Laboratories
Assembly lines
Other static-sensitive environments
